

Project Management

The logo for BPE (Best Practice Environment) features the lowercase letters 'bpe' in white on a red rectangular background. Above the letters is a white oval with a red-to-white gradient.

Client Benefits

Carefully chosen, trained managers operating within the framework of latest industry practice ensure the successful delivery of all projects with a competitive edge.

Tried and tested processes within a wide variety of contexts and organisations, proven to effectively deliver business benefit.

Owner/worker structure ensure decision making, skills and resources are aligned for success.

By the application of industry proven principles of project management, within a Best Practice Environment, our Project Managers are able to successfully manage change and deliver business benefits to our customers.

The following key philosophies and attributes illustrate our expertise:

- **Strong Sponsorship and alignment to Client goals**
- **Motivation and Management of people**
- **Adaptable / responsive individuals with Industry specific knowledge**
- **Identification and Management of Risk**
- **Quality Management Systems**
- **Solution Focused Expertise**

BPE consultants have a wealth of practical experience supplemented by regular training in the latest developments maintaining expertise and leadership in project / business benefits delivery.

Experience Base

BPE has a wealth of experience that it can call upon having successfully delivered many projects on behalf of its clients.

Its project list demonstrates a background in all stages of the project lifecycle.

Projects are either managed from our home office or from our clients' sites to suit local conditions.

The company identifies individual employees who maintain expert status in project management through both personal study and company sponsored training.

The knowledge they have is cascaded through the organisation maintaining an up to date knowledge base within the workforce at large.

Details

Strong Sponsorship

Critical to the success of a project is ownership and support. BPE provides sponsorship at director level to promote this philosophy.

This means that our project managers receive the backing our customers demand. Issues over resourcing, alignment of project and business objectives are thus dealt with at the highest possible level.

Adaptable / Responsive Individuals

BPE have a track record of employing adaptable / responsive managers and empowering them to manage and deliver change.

These individuals have a wealth of experience which coupled with our investment in continuing professional development maintains the highest levels of competencies.

Identification and Management of Risk

In responding to an operating opportunity, problem or threat there are inevitable risks. At BPE we have risk management frameworks embedded within in our procedures. We are able to ensure key risks are identified, assessed and addressed at both a strategic and project programme level.

Programme Management

Delivery of business benefits and successful outcomes are assured by implementation of programme management. This structured framework as a vehicle to manage, control, communicate and co-ordinate change.

Quality Management Systems

Our commitment to quality is core to our culture. Use of project tools, templates, training and talent ensures that projects are consistently delivered to the correct standard. This quality culture together with a philosophy of continuous improvement makes BPE a safe pair of hands.
